Bad End Cuts

Good End Cuts

Sharp knives from SUPERION can make a difference in your finished product. With premium grade staple cutting knives from SUPERION, you can be assured of the highest quality end cuts bale after bale. In some cases they have been known to produce up to 3,500,000 kg. and more of clean cut fiber.

You'll find SUPERION, INC. of Ohio is now the expert's choice for staple fiber and plastic film cutting operations. You can depend on SUPERION blades to cut cleaner, longer, day after day.

1. SUPERION blades are crafted from only the finest premium grade micrograin tungsten carbide. They hold their edge up to 20 times longer than steel.
2. Every blade is guaranteed superior quality.
3. 100% of SUPERION's edges are inspected under magnification to meet your exact requirements.
4. SUPERION blades are manufactured in our Ohio plant, following our time-proven 30-year tradition of excellence and performance by experienced craftsmen.

For sharp, clean cuts, longer tool life and uninterrupted production runs...even on the most abrasive fibers and films, from polyesters to aramids...choose SUPERION blades.

Other knives available for cutting adhesives, films and foils.
